PROJECTS

CultivAI (Smart Farming Tool)

- A farmer-centric app leveraging AI to enhance agricultural productivity. It provides real-time insights on weather, soil health, and crop management, enabling precision farming.
- The app integrates machine learning models and IoT-based sensors to offer tailored recommendations for higher yields.

Project Raseed

- An AI-powered smart wallet that analyzes receipts and spending patterns in real time. Using Google AI tools like Gemini and Vertex AI Agent Builder, it processes multimodal data, including images, text, and transactions to deliver meaningful financial insights and simplified money management.

Sentiment Analyzer (for social media platforms)

- Developed a machine learning-based platform using Python, Streamlit, and Docker to analyze and visualize user sentiments from social media comments. Deployed an interactive web app for real-time sentiment insights.
